

Unique play attractions for schools and public places throughout the UK

CASE STUDY

BISHOPS CANNINGS C OF E SCHOOL

Location: Devizes
Budget: £71,600
Installed: November 2023

"Designing a new play area with Natural Playscapes has exceeded all of our expectations. From the very start the team listened to our ideas and helped us to bring our project to fruition, on time and in budget. It has totally surpassed our initial thoughts and we now have a play area which completely compliments our new extension and sits perfectly in an area of outstanding natural beauty. The whole team are extremely professional, super friendly and always putting the pupils first. They designed play equipment which is exciting and creative, is suitable to be used all year round and used natural products of excellent quality. We are delighted with our finished product and cannot recommend Natural Playscapes highly enough." - Caroline Martin, Chair of Governors

Bishops Cannings CE Primary School contacted us in early 2023 with plans to develop a large space once occupied by a mobile outdoor classroom into an exciting space for the children to enjoy. The school is set in the beautiful Wiltshire countryside so the team were looking for equipment that would compliment their surroundings, our natural hardwood timbers were exactly what they were looking for.

Having been given the initial brief to create an active social space we worked closely with school governor Caroline and head teacher Catherine to get the design exactly right for the 5 to 11 year old pupils. The final design comprised of a large climbing structure featuring nets, dens, bridges and a climbing wall, a timber trail, social seating spaces, planters and a full resurface in bonded rubber mulch.

It has been an absolute pleasure for us working with this warm and friendly school, we know the new space will bring so much to the children for years to come.
