Unique play attractions for schools and public places throughout the UK

CASE STUDY

DUNHURST SCHOOL

Location: Hampshire
Budget: £26,000
Installed: October 2022

We were delighted to be welcomed back for our third installation at Dunhurst School to transform their play space for the older children. As part of our climbing installation we reused an existing slide from their old structure to reduce waste.

The climbing structure also features a charming cedar shingle apex roof on the square platform, bannister rails, balance beams with overhead ropes, clamber nets, a fireman's pole and a wobbly ladder, so there are plenty of options for different abilities.

The school are thrilled with their new play space that has transformed the area and increased the usage of their old slide!
