

Unique play attractions for schools and public places throughout the UK

# CASE STUDY

## FOREST SCHOOL

Location: London  
Budget: £40,000  
Installed: December 2020

The design at Forest School incorporates the trees on the site creating a unique climbing structure featuring a fireman's pole, a clamber net, a tunnel, a clamber bridge, our bespoke colourful canopy panels and a wobbly ladder. The three bespoke platforms around the trees make this an incredibly exciting and imaginative play space. The school also has an individual canopy roof den with bench seating as a more enclosed creative learning space.
