

Unique play attractions for schools and public places throughout the UK

# CASE STUDY

## HOLT GARDEN CENTRE

Location: Norfolk  
Budget: £40,000  
Installed: March 2021

"Being located in an Area of Outstanding Natural Beauty we wanted a play area that would sit comfortably in its North Norfolk coastal woodland surrounds and have a strong visual impact, thereby generating very positive footfall from existing and new customers.

Natural Playscapes was the natural choice. Very professional, friendly, well managed, delivered on time and good value."

- Duncan Ross, Managing Director

We worked with Holt Garden Centre to design and install a bespoke climbing structure, basket swing and tree lab surrounded by play chip surfacing. The climbing structure formed a unique tipi shape with a variety of elements attached to it - from bridges and wobbly ladders to balance beams and nets.

The tree lab offers a different learning experience where children are able to sort items found on the floor and is open to interpretation with their young imaginations.

The basket swing provides dynamic play and is an accessible addition to the playground that is loved by all.

Our playground has been well received by visitors with a brilliant response!
