

Unique play attractions for schools and public places throughout the UK

CASE STUDY

OSWALD ROAD

Location: Manchester
Budget: £45,000
Installed: November 2021

Oswald Road Primary School approached us looking for a playground upgrade for their 4 and 5 year olds. We designed a bespoke climbing structure to fit around the existing trees on site which was suitable for a variety of abilities. The climbing structure included: curved monkey bars, a climbing wall, platforms around trees raised at different heights, a clamber net, a bridge, a social slide and a wobbly ladder.

They also had a sand and water play area that we designed and installed, which was covered by a colourful rainbow themed canopy roof. The water play unit sits within a pebble pit with stainless steel trays and a vertical pulley system. The decked walkway separating the two areas has a tipping bowl attached to it which makes the sand pit area more interactive.

The children love their new play space and the opportunities it provides!
